EDUCATION

National Economics University (NEU)

Bachelor of Data Science in Economics and Business (CGPA: 3.55/4.0)

Hanoi, Vietnam

Aug 2023 – Aug 2027

RESEARCH EXPERIENCE

Predictive Models and ML Research Application Lab (NEU)

Research Assistant

Hanoi, Vietnam

Jan 2025 – Present

- Bridged academic research and business applications by fine-tuning transformer architectures (**BERT/RoBERTa**) for domain-specific NLP tasks.
- Hosted local seminars and technical training sessions to foster a collaborative research environment and knowledge sharing.
- Synthesized state-of-the-art literature on Agentic AI frameworks (e.g., OpenClaw, Coding Agents) by analyzing **50+** academic papers to guide architectural decisions.

Scientific Student Research Competition (NEU)

Student Researcher

Hanoi, Vietnam

Sep 2024 – Mar 2025

- Implemented **spatial econometric models with panel data** to quantify policy impact, utilizing rigorous statistical tests to validate hypothesis significance.
- Recognized with the university-level **“Student Research Award in 2025”**.
- Co-authored a paper published in the proceedings of a national scientific conference regarding Vietnam’s economy.

RESEARCH PUBLICATIONS

Conference Proceedings

- [1] M. D. Phung, B. D. T. Vu, T. L. Ly, T. H. T. Duong, and K. L. Pham, “The regulatory role of provincial governments in the impact of labor shift on agricultural production efficiency in Vietnam,” in *Proceedings of the National Scientific Conference: Vietnam’s Economy in 2024 and Prospects for 2025*, Promoting Economic Institutional Reform in the New Context, Hanoi, Vietnam: National Economics University Publishing House, 2025, pp. 488–501.

PROFESSIONAL EXPERIENCE

Alpha Data Academy

Agentic AI Engineer

Hanoi, Vietnam

Jun 2025 – Present

- Architected a **LangGraph**-based multi-agent system to automate a legacy manufacturer’s sales process, achieving a **97.95% performance score** across 1,051 scenarios.
- Engineered asynchronous request logic via **FastAPI** and containerized agent services with **Docker**, supporting **200+ concurrent requests** with **sub-100ms latency**.

SKILLS & INTERESTS

- Technical Stack:** Python, SQL, C++, React, Node.js, Docker, AWS, Git, FastAPI, Supabase.
- AI/ML Stack:** PyTorch, TensorFlow, HuggingFace, LangChain, LangGraph, Scikit-learn, Qdrant (Vector DB).
- Interests:** Agentic AI Research, Financial Modeling, Competitive Hackathons.
