EDUCATION

National Economics University (NEU)

Bachelor of Data Science in Economics and Business (CGPA: 3.55/4.0)

Hanoi, Vietnam

Aug 2023 – Aug 2027

EXPERIENCE

Alpha Data Academy

Agentic AI Engineer

Hanoi, Vietnam

Jun 2025 – Present

- Achieved a **97.95% performance score** across 1,051 B2B2C sales scenarios by architecting a **LangGraph**-based multi-agent system to automate a legacy manufacturer's sales process, utilizing **Supabase PostgreSQL** for state persistence.
- Supported high API load of **200+ concurrent requests** with **sub-100ms latency** by engineering asynchronous request logic via **FastAPI**, orchestrating containerized agent services with **Docker**, and implementing observability using **Grafana**, **Prometheus**, and **Opik**.

Predictive Models and ML Research Application Lab (NEU)

AI Research Assistant

Hanoi, Vietnam

Jan 2025 – Present

- Synthesized state-of-the-art literature on Agentic AI frameworks (e.g., OpenClaw, Coding Agents) by analyzing **50+** academic papers to guide architectural decisions.
- Co-authored a comprehensive research report on Agentic AI adoption, translating technical evaluation metrics into actionable business impact for non-technical stakeholders.

FEATURED PROJECTS

Agentic Financial Advisor Architecture (Swin Hackathon 2026)

Lead Developer

Feb 2026 – Mar 2026

- Engineered a cloud-native, multi-agent advisory product utilizing **LangGraph** and **LangChain**, emphasizing complex **planning loops** and strict data governance.
- Designed an end-to-end containerized MVP deployment strategy using **Docker** and **FastAPI**, optimizing for rapid time-to-market and low operational overhead.

Real-Time Multimodal AI for IELTS Assessment

Independent Full-Stack Developer

Jan 2026 – Present

- Architected an **agentic assessment engine**, deploying real-time audio pipelines with the **speech-to-speech Gemini Live API** via WebSockets.
- Programmed the agent to autonomously manage state progression and dynamic conversational memory, ensuring strict contextual consistency across multi-turn language evaluations.

Domain-Specific Conversational AI (Master AI Hackathon 2025)

Project Lead

Oct 2025 – Dec 2025

- Architected a **multi-step, hybrid agentic workflow** with custom tools for ROI calculation, integrating **memory modules** to track context across multi-turn sessions.
- Led a team to win **1st Place** out of 20+ teams, delivering a high-precision QA solution scalable to enterprise demands.

SKILLS & INTERESTS

- Technical Stack:** Python, SQL, C++, React, Node.js, Docker, AWS, Git, FastAPI, Supabase.
- AI/ML Stack:** PyTorch, TensorFlow, HuggingFace, LangChain, LangGraph, Scikit-learn, Qdrant (Vector DB).
- Core Competencies:** Product Strategy, End-to-End Execution, Analytical Problem Solving, Cross-functional Collaboration.
- Interests:** Agentic AI Research, Financial Modeling, Competitive Hackathons.
